THE NEW GEN5 MOS PISTOL MODELS

GLOCK INTRODUCES

GLOCK enhances the desirability of the already near perfect Gen5 Models G17 and G19 with the addition of the Modular Optics System (MOS) to the full size and compact GLOCKS.

These Gen5 models are precision machined by computer to provide a mounting system for all popular optic sights – a new paradigm in handgun sighting. With multiple adapter plates, you can quickly and easily mount miniature electronic sights to the rear of the Gen5 GLOCK slide, which has forward serrations for easier and quicker manipulations. Forward serrations were also added to the slide of the G34 Gen5.

The resulting combination of optical sighting and the unparalleled accuracy and reliability of the GLOCK Marksman Barrel (GMB) sets a new standard for this class of pistols.

All of the Gen5 qualities are present in these MOS pistols. The latest GLOCK surface finish on the major metal components, unmatched in hardness and rust resistance, the

high traction Gen5 frame texture, quickly reversible mag catches, ambidextrous slide stop lever, the GLOCK Multiple Back Strap System (MBS) for individual operator adjustability, the universally – acclaimed GLOCK fire control – Gen5 Safe Action® trigger system and high visibility orange magazine followers. When you utilize electronic sights, targets may be engaged from close contact to one hundred yards, quickly and efficiently.

The GLOCK Gen5 MOS Pistol Models will be available for purchase starting from October, 2018. For further information, please contact your GLOCK partner or the GLOCK company directly.
